

3-TERMINAL TRACTOR POWER OUTLET

Power Convenience

Just like the cigarette lighter in your car or truck provides a convenient power source, most tractors and combines come equipped with a convenience power outlet (E4100-A170). What you need is a convenience cable pre-wired and ready to install on any monitor which plugs directly into the tractor/combine power source. If your tractor or combine does not have a factory-installed outlet, the mating connector and power pins are sold separately.

The three power terminals are used for:

1. Orange wire, 12V Ignition/switched power,
2. Red wire, 12V Hot/constant battery power,
3. Black wire, ground.

For use on John Deere / CNH

		Price
E11150	3-Terminal Power Outlet 14 ga. wire with 3' lead	\$ 39.95
E11152	3-Terminal Power Accessory "Y" Cable	\$115.95
